
Addison Bardwell's Biopic

Bio Info

In this first chapter you will know about what schools I go to, my family, pets, and houses I go to.

My Bio

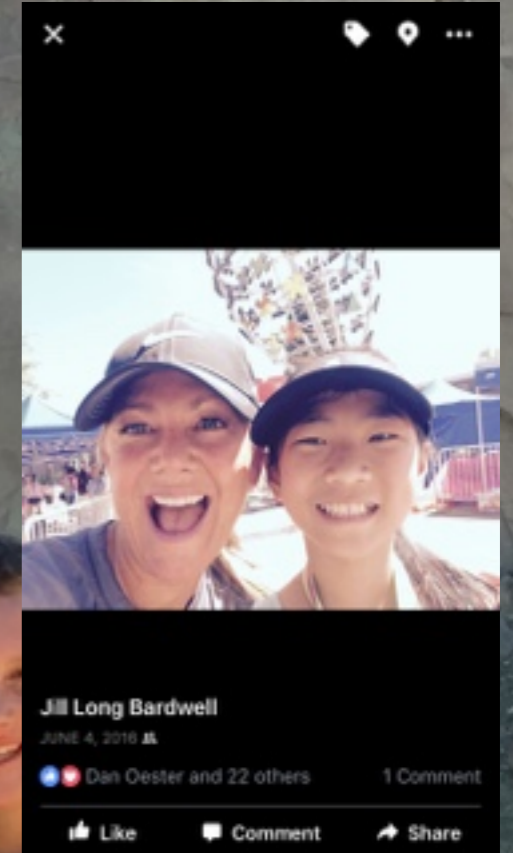

SECTION 1

My Family

I have a large family because I switch back to my mom and to my dads. Although in the picture in the back shows our cousins. The picture on the side shows 6 years ago on Christmas to last Christmas. I obviously changed and so has my siblings!

The picture on the side is when me and my mom did the 5k for girls on the run. The one in the bottom shows my brother, my mom, and I hiking.

Schools

My first school I went to was Gilham Elementary. I have been there for six years.

This is Cal Young Middle School! This is where I go for Middle school until I go to high school.

This is where I will be going to high school in the future. Sheldon high school is huge and I am so excited to go there in the future!

SECTION 3

My Pets

This is my fattest dog. His name is Bubs and he is the second youngest dog out of all of the others.

The Dog in the background is my personal favorite out of the other dogs. She is funny and looks like a fox. her name is Bella and we got her from an adoption center because she was abused by someone.

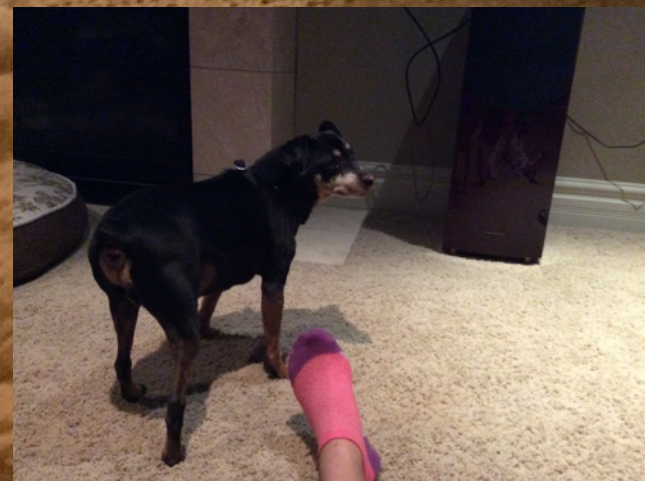

This is the diva of the family and wants all the attention. Her name is Tinkerbell and she always is picky about her food, bed, treats, and more

This dog is the youngest and is a totally a brat. His name is Dexter and he bites, scratches, and rips up me, my brother, and my mom. He also likes to climb on my brother and I like a parrot.

This dog is named Nemo. He is the oldest dog and is a miniature pinscher.

SECTION 4

Friends

I have lots of friends but I don't spend time with most of them. Some of my friends are Jade, Brooklyn, Olivia, Dori, Kaileigh, and Elsa.

This some of my friends on Halloween. I dressed up as a Devil for Halloween while my friends were Ray from Starwars, Zombie Astro-naut, and Little red riding hood.

This is when I was at Potter's Quarter on my Birthday. I invited Brooklyn and Olivia to my Birthday party.

Favorites

In this chapter you will learn about what my favorite things are.

THESE ARE A FEW OF MY
FAVORITE THINGS

SECTION 1

Sports

My favorite sports are Volleyball and Track. I just started track and I am totally planning on doing it in the future. I played Volleyball since 3rd grade and I still do now. I like how they are not that competitive than other sports like Football and Soccer but that is just my opinion.

My favorite event is relay but its actually not an event but I love relay!

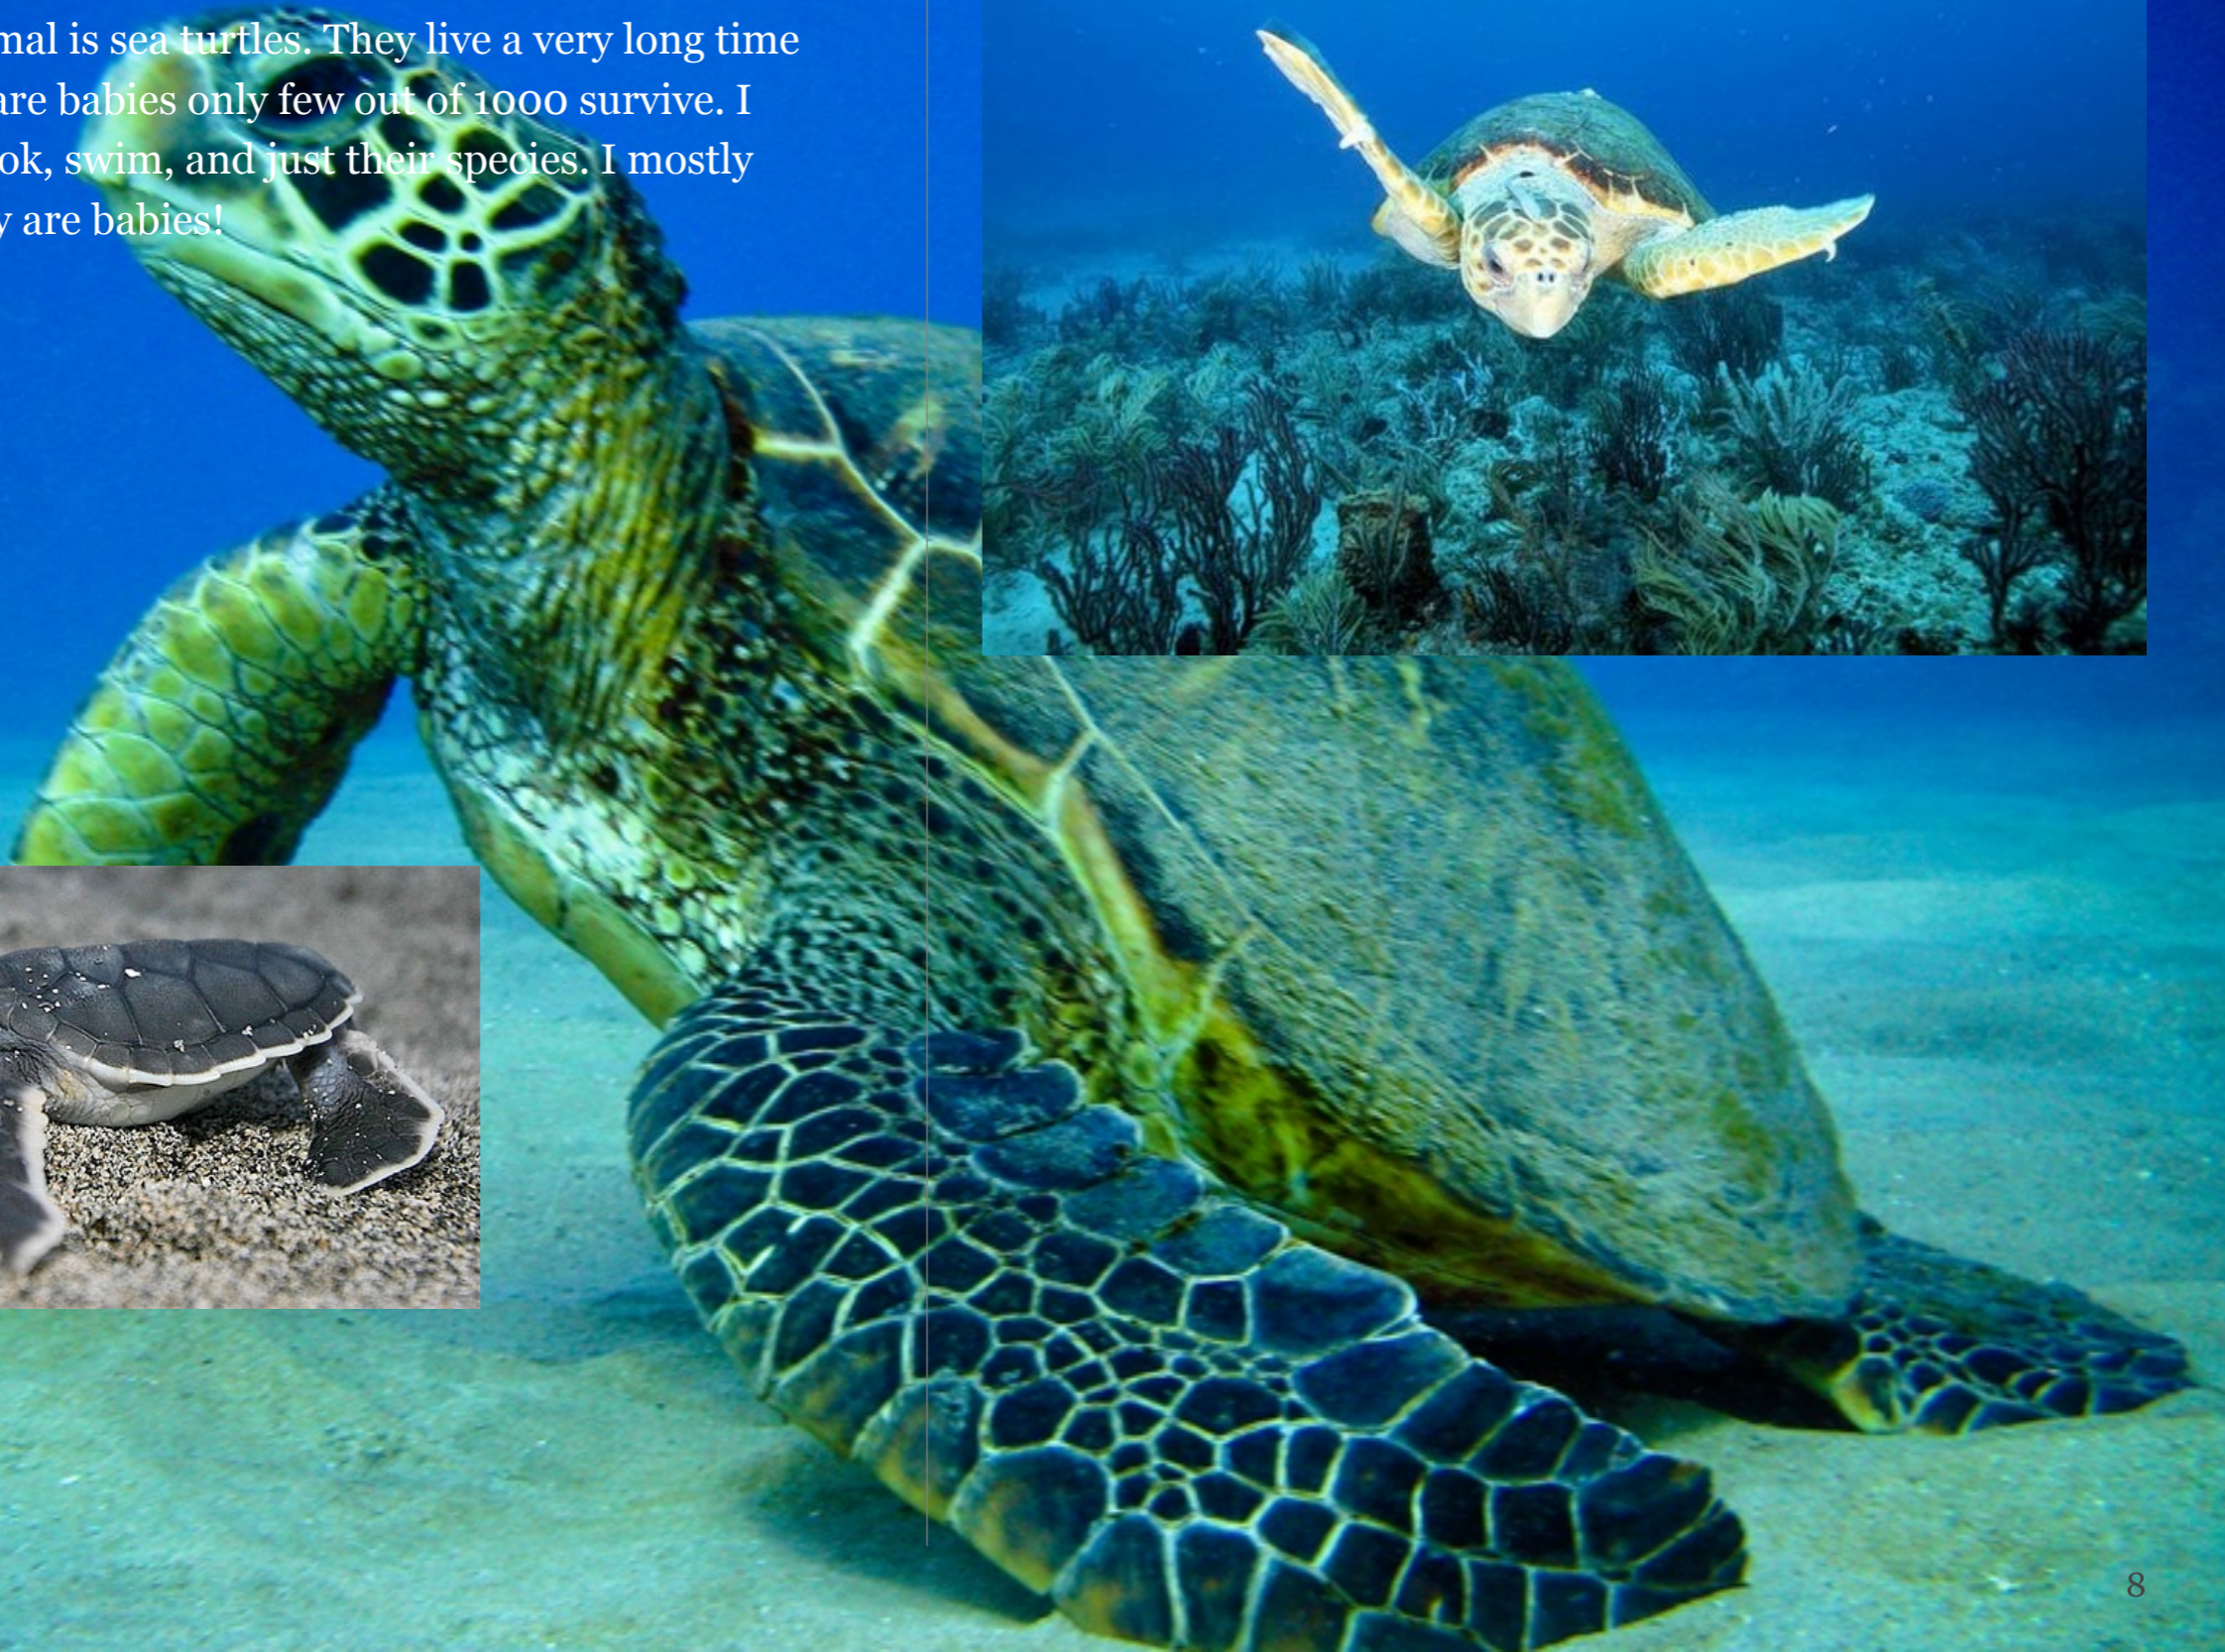

My favorite position in volleyball is the server. I am not that good at setting and hitting so I like staying in the back of the court helping the front.

SECTION 2

Animal

My favorite animal is sea turtles. They live a very long time and when they are babies only few out of 1000 survive. I like how they look, swim, and just their species. I mostly like it when they are babies!

SECTION 3

Colors

Colors I like are cyan, blue, and purple. These colors are soothing dark colors that look nice when I see and drawing anything. Things with those colors like galaxy painting and gemstones look very cool to me.

SECTION 4

Places

I love anything that requires art. Well except clothing but this is one place that I like to go to once in a while. I also go here on my Birthdays.

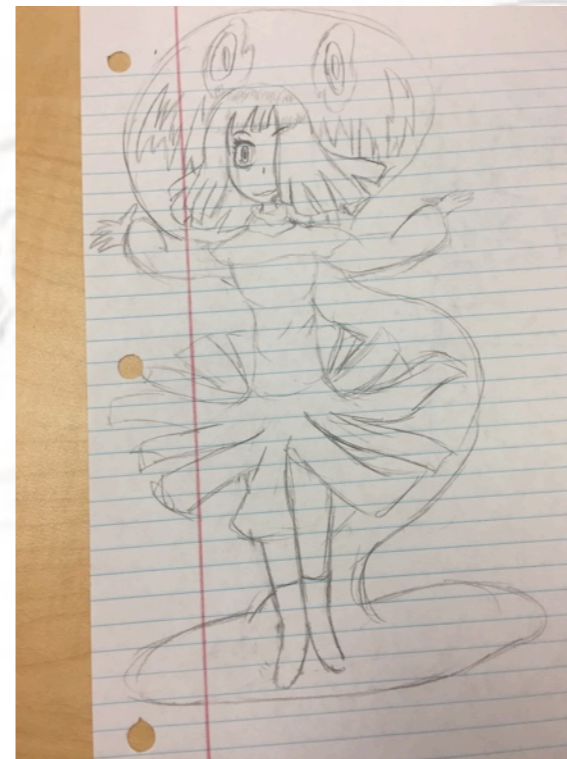

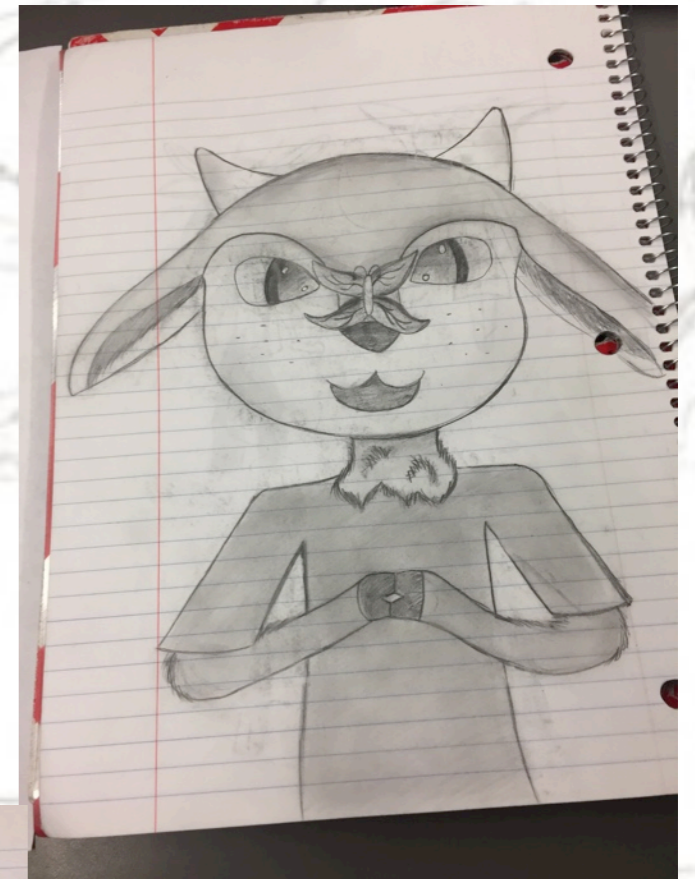

When I go to my mom's house I sometimes go to Jamba Juice. They have good smoothies that are very healthy for you and tasty! I even meet people that I know there to. Jamba has camps on the wall if anybody is interested in them.

Drawing

I love to draw so so so so much! some people at school think I just draw but I do so much more than that. I started drawing when I was three years old but I wasn't that good. I was self taught and I would draw in the middle of class a lot. Teachers would tell me to stop but later on they didn't because I got good grades.

Here are some drawings I made. I like to shade and sketch out drawings. If I get the time I ink them black and color them.

Gaming

IDEAS

When I am at school everybody thinks that I love to draw more than anything else but I would rather play video games on my laptop. I usually play Minecraft and Undertale . They both have bad graphic but good game play. I would rather play something that is good but with retro style theme than a smoother kind of game.

These are the kind of headphones I use for my computer. They really block out the sound so that I can hear because my house is loud.

⚔ FIGHT

🔊 ACT

👑 ITEM

✂ MERCY

SECTION 3

Roller Blading

Roller Blading is one of the many hobbies that I do. I like to roller-blade outside around the neighborhood. When I plan where my birthday party is I usually planned to do it at Skate World but I don't anymore because my friends can't rollerblade or roller skate.

This is what the shape of my rollerblades look like but its a different brand with the colors white, pink, and black.

Careers

In this chapter I will show what career choices that I want to be when I grow up. There are many things that I want to do!

SECTION 1

VolleyBall Player

I always thought that you wouldn't have permanent spots in Volleyball but there is always a permanent setter. Having someone that is actually good at setting would help me not be a setter. I love hitting and serving so when I get older I hope to be a Volleyball player so I could have better upper body strength and play with or against my friends.

SECTION 2

Artist

Being an artist would be more on my fun creative side. Not only I can be just a regular artist but if I become one I would probably like to work for Disney or Pixar

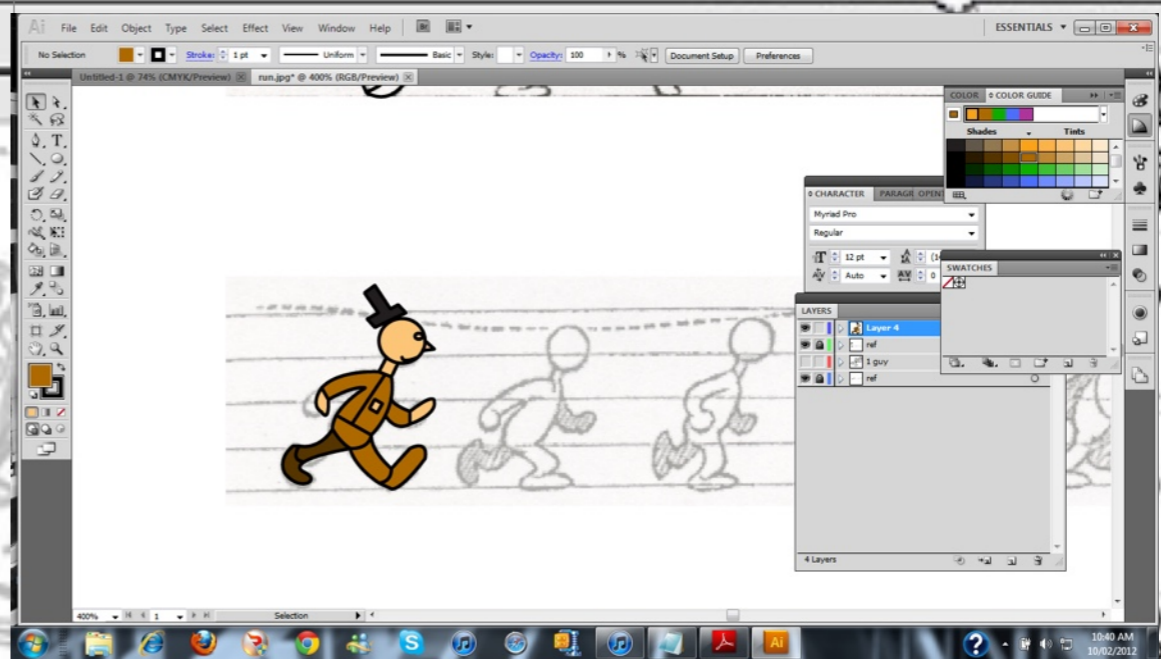

If I was an artist I would be the kind that likes to draw more than color or paint. Sketching is another thing I like to do because I can work with different bodies of people and animals.

SECTION 3

Animator

Animation is one of the electives that I really wanted in 7th grade and I think its pretty cool on how it works. Like imagine making an animation that millions of people watch. I think that would be very amazing to make characters coming to life and getting to see how it all turns up in the end.

Certain people use different programs. Although I don't know any programs that have animation but I would like a program that lets you move the body structures of your characters.

Navigation and editing tools including a timeline with play, stop, and keyframe icons, a color palette, and a color picker with RGB, HSB, and CMYK sliders.

The interface includes a color palette with various color swatches and a color picker with sliders for Red (R 0), Green (G 0), Blue (B 0), and Opacity (A 255). There are also sliders for Hue (H 0), Saturation (S 0), and Value (V 0).

SECTION 4

Track Player

When I first started track I was forced to do it but when I finished track I loved it! Some people don't like running so they do field events but I'm all about them! If I become a track player I would want to participate in the 100 and the 200m.

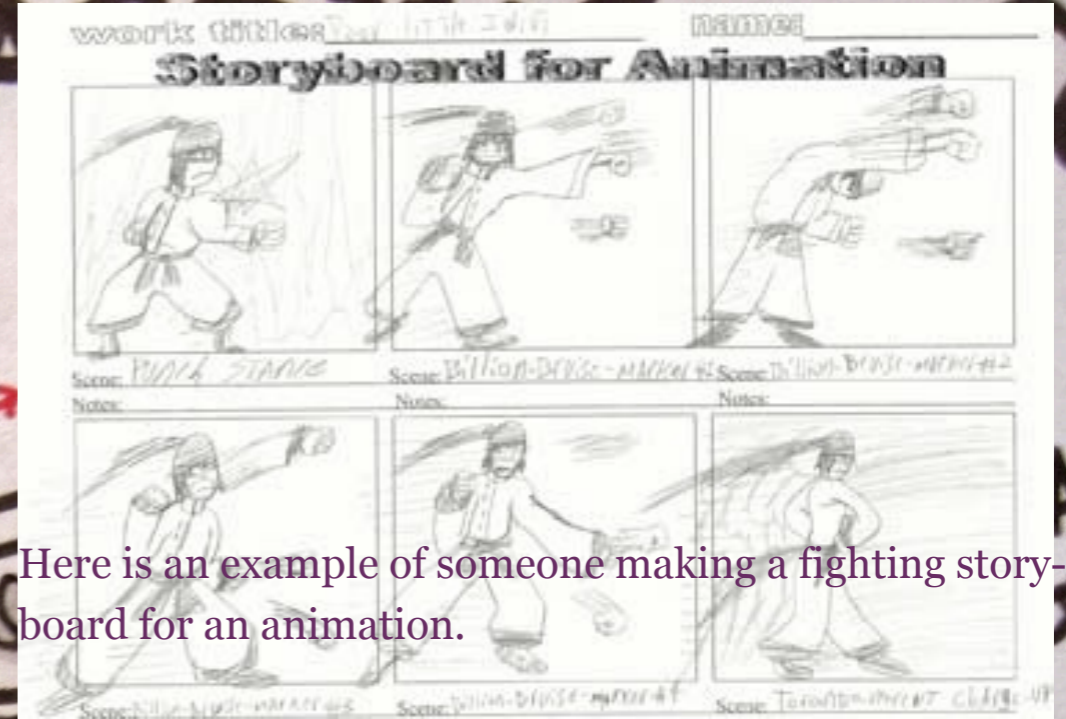

If I was ever fast enough to be on the relay I would also do that to! Relay is very intense and I would always get scared of not grabbing or giving the baton to someone.

SECTION 5

Story Board

Storyboarding is like animation but a rough sketch of it. It can also be used for comic like book sketches. Without storyboards they won't have the best animation. It will also help you keep them in position and have them planned out like you want them to. If you don't like a part of the storyboard then you can just change it in the animation!

Here is an example of someone making a fighting storyboard for an animation.
