

Script

(Music starts)The camera is far away from the first animal (unknown).
As the camera gets closer, the animal appears to get bigger.

The animal then opens its mouth, and the next animal crawls out of its mouth.

Step 3 will repeat itself 5 times. (With the other animal)

The animals will then scatter and then the (original) animal will start eating the other ones.

The camera angle will be following the original animal until he can eat all of the animals. The animals will keep running. (Music change), big Elephant Seal comes down and eats all the animals.
