Stop Motion Proposal

Our stop motion play is going to be based on a 1930's horror movie, the plot of the stop motion film, is going to be that a detective is trying to solve a case where five victims mysteriously disappear. We are going to need human beings, alive preferably, a tri-pod, we will also be using, text slides, pictures, and a filter to convey a strong sense of horror in our stop motion animation. We are purposely going to be using the 30's movie style of black and white, and choppy film motion.
