Science Family Fun Night

Please join us this Tuesday evening at 6:00 p.m for our Title Family Fun Night.

World Heroes Project

We have been learning a great deal about many important world heroes as students have been presenting their special projects. This week students will be presenting the last round of presentations, and wrapping up the project. It has been a pleasure to see the children work very hard at researching, rehearsing, and presenting their reports. Speaking in front of a large group can be a little scary for 5th graders. They have been extremely good listeners and very supportive of each other as they have tackled this rigorous project.

March Book Project

Students will be assigned a book project for March/April. The genre will be Fantasy or Adventure. Students will be checking out a book this Thursday to begin reading for the project. Instructions for the project will be sent home next week. Students

should just begin reading their books this week. Projects will be due on **Friday, April 14th.**

New Artist in Residence Begins

Our class will begin four new sessions of Visual and Craft Art with Ms. Maiya Becker. Our first session begins this Tuesday, March 7th. Students will be making projects using recycled materials. Projects will include self portraits, make-your-own-monsters, animal models and more. Students are excited to “dig in” and begin creating.

Mixtures and Solutions Science Unit

Last week our class learned about separating liquid mixtures with screens, filters, and by evaporation. This week we will begin our second investigation which features separating solid mixtures. Students are very engaged in this new science program and are demonstrating good science knowledge in their science journals each lesson.
