

IB Math - Assignment #1

due *Friday, September 6th*, the third day of class

Part 1 (do by tonight) - The IB Math Website for this Class

Find the Staff Directory on the Sheldon Website. Navigate to Mr. Cedarlund's website <http://blogs.4j.lane.edu/cedarlund/> and do the following:

A. Observe the **Course Information** section in the right margin. Tour the five sections under **IB Math** to get a familiarity of what is available. You will be using these resources on and off throughout the course.

- **IB-Math Information**
- **Extra Practice Links**
- **Project Support.**
- **Preparation for May 2020 IB Math Studies Exam.**
- **Data Sources for IA.**

B. In the right Margin, find the **Daily Assignments** header and select **IB-Math Studies Assignments**. This is where I post daily assignments and other occasional information. I update this site by the end of the school day. You are required to check this site after any absence before you return to class. [best if you check it the very day you are absent].

Open up the September assignments by selecting "*click for AP Statistics September Assignments*".

C. Your first few units in this class will be related to Statistics. To get an overview and some details with some of the basics you will go back to the **IB-Math Studies Assignments** section for Wednesday September 4th and open the link to the "**Against All Odds**". Watch the following videos over the next two days.

1. What is Statistics?
2. Stemplots
3. Histograms

continue to back side

Part 3 - (you have two days to this part as well. It is due Friday of this week)

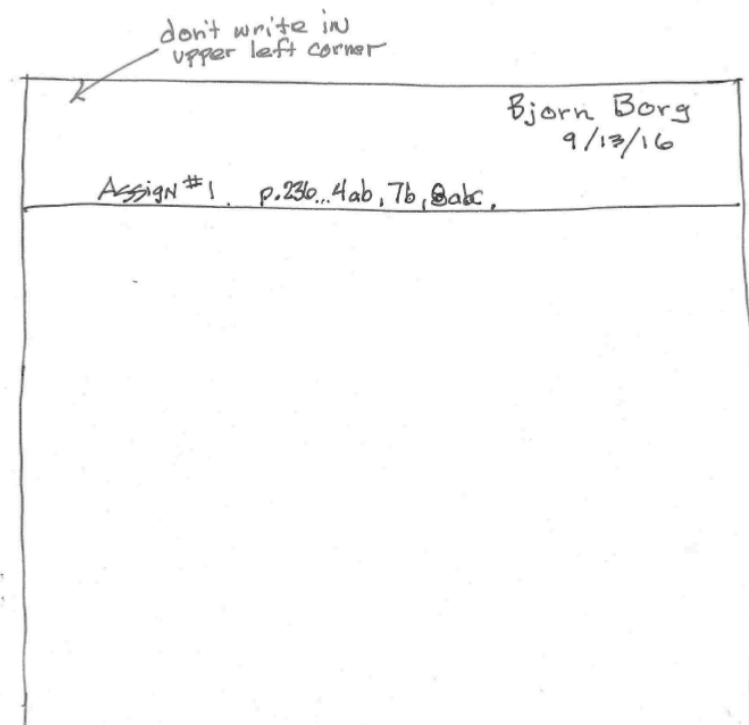

You will do some problems from a packet out of Edition 3 of a book called "*Mathematics for the International Student, Mathematical Studies*" (by Haese and Harris out of Australia). Pick up the packet in class from on Ch. 6 (Descriptive Statistics). Do the following problems on separate paper.

-Read pp. 159-168

-Do p.160....6A...1 a to g
p. 165....6B...4
p. 167...6C...2 and 3
p. 168...6D...1 and 4

It only looks like there are 6 problems but some of them have multiple parts. Be neat and label your problems.

*Your header on assignment papers should look like below:
(Name should be in ink)*

Checking Your Answers

Throughout this first unit, always check your work using the link **Answers to Ch. 6 Homework**. You should see this link on the Website under IB-Math Assignments for Wednesday, September 4th.
