SMELLING PARKINSON'S DISEASE

What if a lady walked into a medical facility and said she can smell if someone has this disease?

5. Create a dot plot of the number of correct identifications with the rest of the class. Record the results below.

6. In the actual experiment, Joy identified 11 of the 12 shirts correctly. Based on the very small-scale simulation by you and your classmates, what proportion of the simulations resulted in 11 or more shirts correctly identified, assuming that the person was guessing?

$$\frac{0}{26} \approx 0\%$$

Who am I ?

Who ^{are} ~~am~~ ^{we} ~~I~~ ?

- Groups of 3 to 4
- What is common?
- I will hang up your finished product

About AP Stats

What is AP Statistics?

AP Stats is a college level introductory course in statistics. You'll learn how to collect, organize, analyze, and interpret data.

It is the fastest growing of all of the 37 AP subject areas with now over 108,000 students taking the exam.

Why should I take it?

Statistics is the most widely applicable branch of mathematics. It is used by more people than any other kind of math.

College Majors Requiring Statistics

Statistics is specifically required in some majors, while it is a quantitative methods requirement in others.

AGRICULTURAL SCIENCES

Agricultural and Environmental Plant Sciences
 Agricultural Business
 Agricultural Communication
 Agricultural Education
 Agricultural Mechanization and Business
 Agricultural Systems Management
 Agronomy

How hard is AP Stats?

It's a college course, so the expectations are high. You will need to think hard about the concepts. You'll write – a lot. You won't get a good grade just for showing up. You must have a strong work ethic.

Do you have to be a top rate mathematician?

No. The course does not depend heavily on abstract mathematical concepts, but you **DO** need a strong background (usually A's and B's) in Algebra II – Our calculators will help us with much of the numeric drudgery inherent in statistics.

Can I take Stats in college?

Yes. Statistics is required for many majors, and strongly recommended for others. However, we hope our students receive AP grades high enough to get credit for the introductory course. If not, you will have strong background before you start.

Would it be my only math course ?

It could be. Many students could also enroll in a Pre Calc or Calculus course and find the combination very 'do-able'. It can be taken any time after Algebra 2. In any case, stats is not really a 'math' course – it's a whole different animal.

Syllabus

Some of the
Syllabus

finish later on your own

Supplies:

- ✓ **Textbook** (The Practice of Statistics, AP Edition, 6th Edition, Starnes, Yates, & Moore, 2019)
- ✓ ***Strive for 5*** which is a softcover review book. DO NOT write in this book.
- ✓ **Calculator** – MANDATORY, no exceptions - with statistical functions (TI-83 or 84)

- ✓ **Three-ring binder** (1.5 inch) with dividers labeled as follows:

- ▣ **Statistical Tools:** Tables, Formulas, and Calculator Instructions

- ▣ **Notes:** On most days, you write on Prepared Notes which will be provided for you. Keep these organized the entire year in your 3-ring binder. You will be using them to review throughout the course and for the AP Exam as well. You may even want to have labels for each of the 12 chapters in your 3-ring binder.

to "note" or
"not to note"

to "note" or
"not to note"

↪ it would make more sense to
add your own notes to the structured
notes after you have read the textbook.

✓ **Three-ring binder** (1.5 inch) with dividers labeled as follows:

- **Statistical Tools:** Tables, Formulas, and Calculator Instructions
- **Notes:** On most days, you write on Prepared Notes which will be provided for you. Keep these organized the entire year in your 3-ring binder. You will be using them to review throughout the course and for the AP Exam as well. You may even want to have labels for each of the 12 chapters in your 3-ring binder.

speaking of which

✓ **Pens and pencils, ruler, and occasional pieces of lined paper.**

You may use either pen or pencil. I expect to be able to easily read your writing.

strive for small, but neat, writing

Overview

LEARNING TARGETS

By the end of this section, you should be able to:

- ✓ IDENTIFY the individuals and variables in a set of data.
- ✓ CLASSIFY variables as categorical or quantitative.

↖ I'll post L.T. on side board.

Organizing Data

Statistics is the science and art of *collecting, analyzing, and drawing conclusions* from data.

Normally there will be a variety of experiments, simulations, examples, discussions, activities to help you accomplish learning targets.

- but today you are on your own.
- take notes as needed, from the textbook.

Organizing Data

Statistics is the science and art of *collecting, analyzing, and drawing conclusions* from data.

An **individual** is an object described in a set of data. Individuals can be people, animals, or things.

Organizing Data

Statistics is the science and art of *collecting, analyzing, and drawing conclusions* from data.

An **individual** is an object described in a set of data. Individuals can be people, animals, or things.

Variable - an attribute that can take different values for different individuals

Variable - an attribute that can take different values for different individuals

Categorical Variable
assigns labels that place each individual into a particular group, called a category.

Quantitative Variable
takes number values that are quantities—counts or measurements.

You will need to know terms and definitions in context, but most questions generally won't require you to write definitions.

Categorical Variable

assigns labels that place each individual into a particular group, called a category.

Quantitative Variable

takes number values that are quantities—counts or measurements.

↪
Values are usually
words
(but not
always)

zipcodes 94563
37214

area codes 541
503

category.

↪
Values are usually
words
(but not
always)

zipcodes 94563
37214

area codes 541
503

↪
quantitative variables
like age, weight, etc
can be divided into
categories

it depends on how
you want to use
the variable

Analyzing Data

Variables

Province	Gender	Number of languages spoken	Handedness	Height (cm)	Wrist circumference (mm)	Preferred communication
Saskatchewan	Male	1	Right	175.0	180	In person
Ontario	Female	1	Right	162.5	160	In person
Alberta	Male	1	Right	178.0	174	Facebook
Ontario	Male	2	Right	169.0	160	Cell phone
Ontario	Female	2	Right	166.0	65	In person
Nunavut	Male	1	Right	168.5	160	Text messaging
Ontario	Female	1	Right	166.0	165	Cell phone
Ontario	Male	4	Left	157.5	147	Text messaging
Ontario	Female	2	Right	150.5	187	Text messaging
Ontario	Female	1	Right	171.0	180	Text messaging

Categorical variable
"Preferred communication method"
