

① HW Hotline →

- ② Then  
Pick up and do the Warm Up  
as soon as you get to part **1c**, have one  
person in your group pick up any needed  
graphing calculators from MR.C.

### Warm Up/Notes

1.1.3

1a. Can  $-16$  be used as an input for  $f(x) = \sqrt{x}$  ?

No, therefore  $-16$  is not part of the  
domain of this function

b. Find two more values that are not part of the domain  
of  $f(x)$

-1      -153  
-2

any negative # would not  
be in the domain.

- c. Make a sketch of the graph of  $f(x) = \sqrt{x}$  →

- d. Describe the domain and verify with the "TABLE" on your graphing calculator.

domain:  $0 \leq x < \infty$

$$x \geq 0$$

2. a. Make a sketch of  $g(x) = -(x-2)^2$

- b. What is the domain?  $-\infty < x < \infty$

- c. What is the range? (of possible y-values)

$$-\infty < y \leq 0$$

R

3. Now make a detailed graph of  $f(x) = \sqrt{100-x^2}$

Describe the domain .

Describe the range .

TEXAS

NORMAL FLOAT AUTO  
PRESS + FOR  $\Delta$ Tb1

X	Y1
-10	0
-9	4.3589
-8	6
-7	7.1414
-6	8
-5	8.6603
-4	9.1652
-3	9.5394
-2	9.798
-1	9.9499
0	10

X = -10

④ Factor  $2x^2 + 7x + 6$

$$(2x+3)(x+2)$$

$$(2x + 3)(x + 2)$$

⑤  $(2x^3)(-5x^1) = -10x^4$

$$(4x^2)^2 (10x^2) = (16x^4)(10x^2)$$

$$16(x^2)^2$$

$$= 160x^6$$

# HW Questions ?

From now on:

16)

1-16

## 1-20

Make a table and graph the function  $f(x) = \frac{1}{2} x^2$ .

**1-25**

$$3(x - 2) - 2(x + 7) = 2x + 17$$

$$3x - 6 - 2x + 14 = 2x + 17$$

$$x + 8 = 2x + 17$$

$$-9 = x$$

**13 f**

$$3x^2 + 14x - 5 = 0$$

$$( \quad ) ( \quad ) = 0$$

quad.  
term

$3x^2$	
	$-5$

constant

$3x^2$	
	$-5$

 ~~$-15x^2$~~  ~~$14x$~~ linear  
termquad term  
times  
constant

$3x$	$3x^2$	$15x$
$-1$	$-x$	$-5$

 ~~$-15x^2$~~  ~~$-x$~~  ~~$15x$~~  ~~$14x$~~

13d

$$x^2 - 5x = 0$$

↑ factor out GCF

16

a)  $y = 3x + 15$

b)  $y = 3 - 3x$

when  $x = 2$ 

$x = 0$

what is the  
y-intercept?

slope 5  
(0, -2)

(a)  $y = 5x - 2$

(b) find,  $x = 2$

$$\begin{aligned} y &= 5(2) - 2 \\ &= 8 \end{aligned}$$

17

$$f(x) = x^2 + 2x + 1$$

(a)  $f(3) =$

(b)  $f(-4) =$

(c)  $f(-22.872) =$

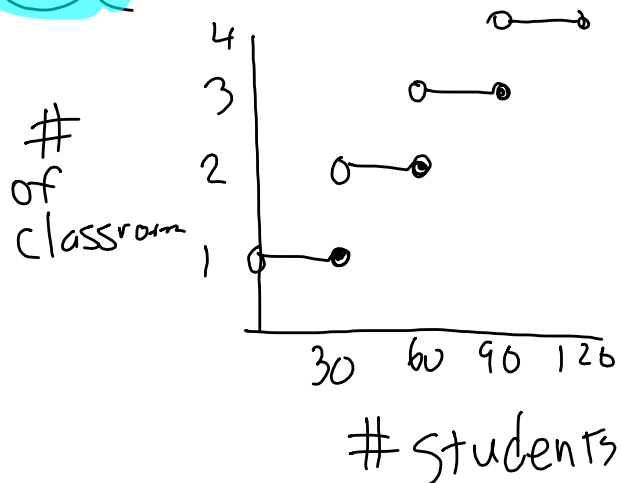

(18) c

Sketch a graph that shows the relationship between temperature and time of day

(23) a

inputs

0 to 120

Outputs

0 to 4

TODAY:

Find **Domain**  
and **Range**

of a function given either  
its graph or its equation.

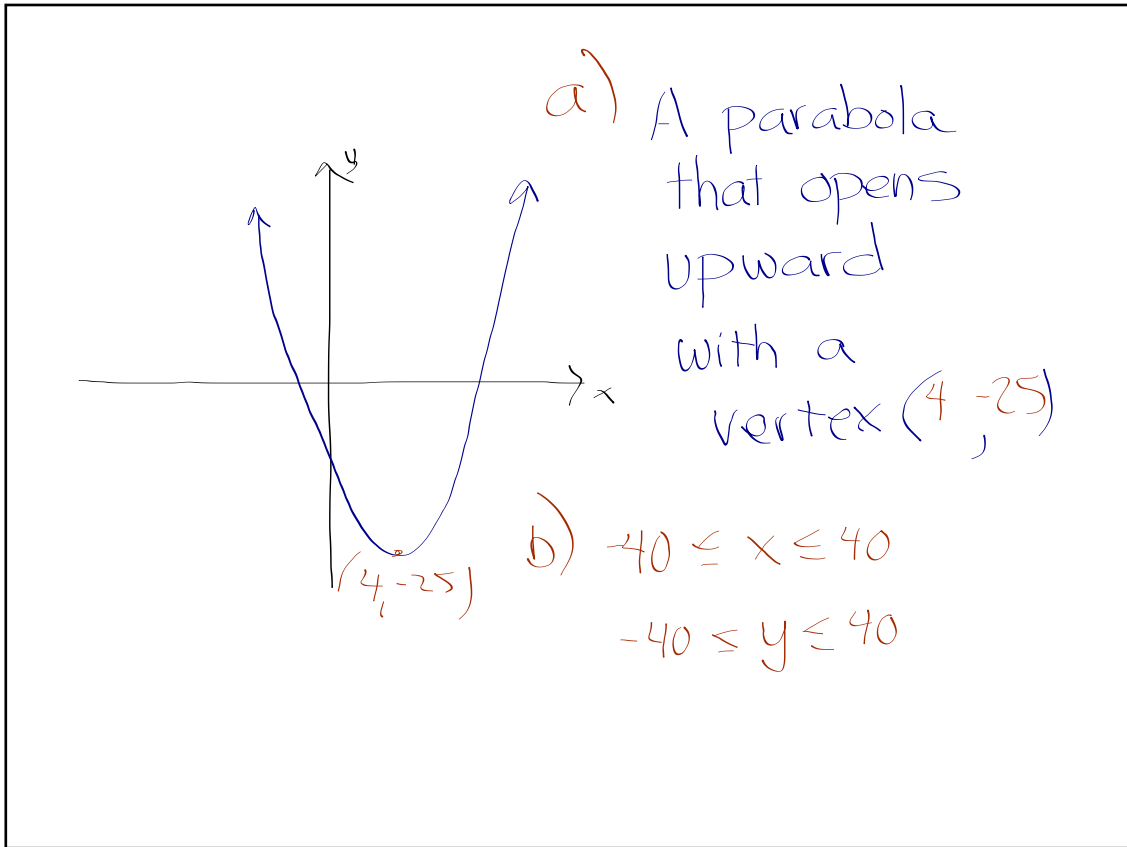

Many days we will use what are called "Core Problems" to develop your understanding of the skills and concepts.

I want you to record this process in your notes.

Do 1-27ab

I'll work along with you.

Start by making a quality  
labeled sketch

1-27 )

a)  $y = (x+1)(x-9)$

describe  
the graph ?

b) What window ?

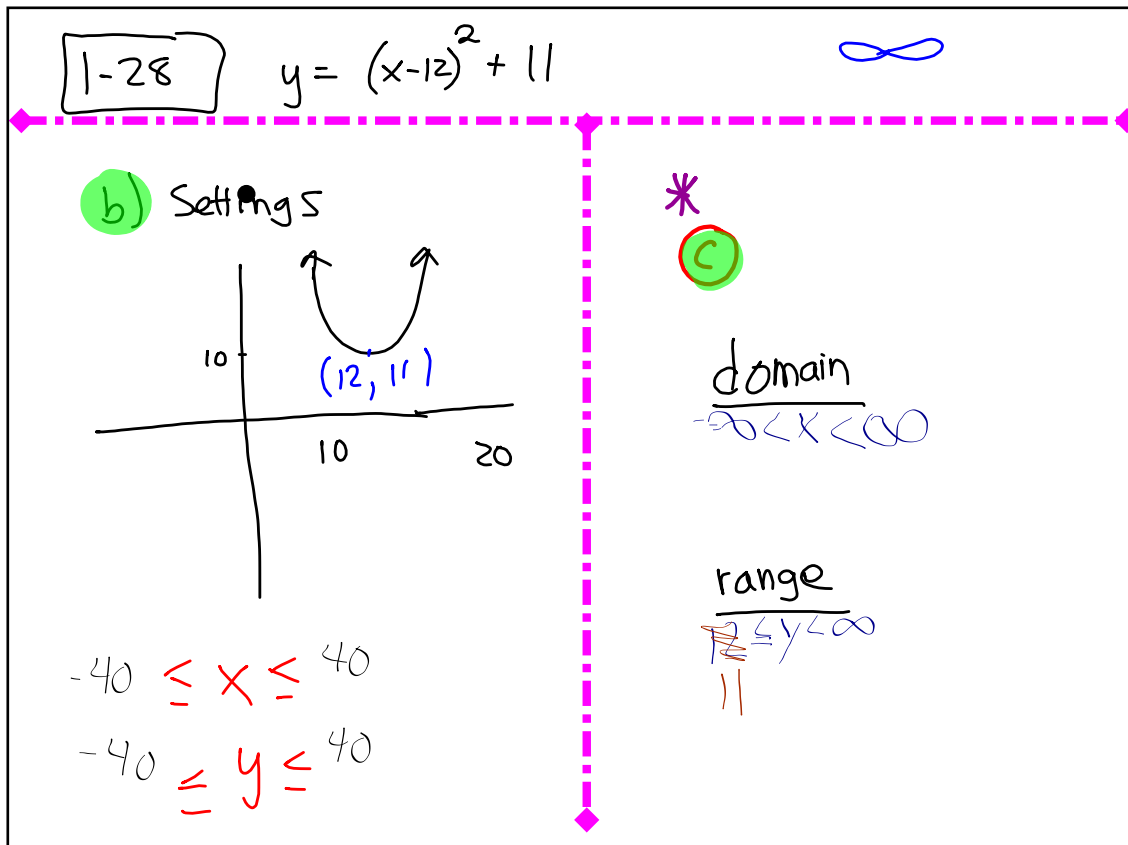

c) How are settings related  
to domain and range ?

Vertex, x-intercepts, and  
y-intercepts

B.B.

continue to  $\boxed{1-28}$  and  $\boxed{1-29}$   
 $\uparrow$  <sup>abc</sup>  
 sketch

- Be sure everyone in your group is Solid before anyone goes on to # $\boxed{1-29}$

1-29a Sketch a function \*

domain  $-3 \leq x \leq 10$

range  $-4 \leq y \leq 6$

b) domain: all real numbers  $-\infty \leq x \leq \infty$   
 range: only 2, 4, 5, 8

1-30

$$5x - y = 35$$

$$3x + y = -3$$

quick  
LCQ

everyone must turn  
their desks forward

when everyone in your pod  
has turned it in, the return desks  
to normal position.

## Assignment

# 1.....34-36, 37acde, 38, 40a

If getting a graphing calculator is a hardship at this time for your family, then see me about getting a loaner from the math department. See me before you leave school today. ●
