**Subject :** [All-principals] Free ebooks for the summer through MyON  
**To :** All Principals <All-principals@lesd.k12.or.us>

Lane County Principals,

Lane ESD is pleased to announce free access to more than 4000 electronic books for students and educators this summer through a partnership between MyON, NCCE, and Oregon ESDs. This partnership provides anytime, anywhere access to a large library of enhanced digital books. **Please share this information with your school staff!**

MyON ebooks will be available through August 31st, 2014. This is the same service that was hosted by ODE last summer and autumn, so you may already be familiar with its use. The materials skew to elementary and middle school levels, though there are some books of interest to high schoolers at a lower reading level.

To access the ebooks, go to [www.myon.com](http://www.myon.com) and click the red **Log In Now** button. The school name is **LESD**. Username is **read**. Password is **read**.

Books can be read online through any internet-enabled device or offline using one of the free mobile apps, links for which can be found on the Lane ESD website at <http://www.lesd.k12.or.us/library/myon.html>.

I'm attaching some promotional tools here, including:

- Flyers for families (in English and Spanish)
- Bookmarks with access information
- Reading log for summer reading
- Instructions for students and teachers

Feel free to share these resources (and the login information) far and wide - including via your school or library website. This information will also be shared with curriculum leaders and school library staff in Lane County and with the public libraries.

There's more information and a video at the Lane ESD website (<http://www.lesd.k12.or.us/library/myon.html>).

Let me know if you have questions. Otherwise, start spreading the word about this summer reading resource!

Thanks,  
Kate
