Oregon
International
Internship Program

For more than twelve years, the Oregon International Internship Program (OIIP) has supported schools in the Eugene-Springfield area. OIIP connects future teachers from China and Taiwan with local K-12 schools. The future teachers serve as full-time interns for five months, providing:

- Assistance with classroom management
- Individual support to students who need it
- Exposure to another culture and worldview

Teachers who supervise the interns receive professional development training from a National Foreign Language Resource Center and professional development units that can be used toward continuing education requirements. Your school and teachers will also receive support from our dedicated OIIP Director and Program Assistant.

OIIP is currently expanding and looking for additional partner schools. Please contact Associate Director Mandy Gettler at mandyl@uoregon.edu or 541-346-1773 for information about how future teachers can enrich the educational experience for your students.
