

# SAMR and TPCK: A Hands-On Approach to Classroom Practice

---

Ruben R. Puentedura, Ph.D.

## Phase 1: Building a Basic SAMR Ladder

Social	Mobility	Visualization	Storytelling	Gaming
200,000 years	70,000 years	40,000 years	17,000 years	8,000 years
				

Ruben R. Puenteodura, "Technology In Education: The First 200,000 Years" The NMC Perspective Series: Ideas that Matter, NMC Summer Conference, 2012.

### The EdTech Quintet – Associated Practices

<b>Social</b>	Communication, Collaboration, Sharing
<b>Mobility</b>	Anytime, Anyplace Learning and Creation
<b>Visualization</b>	Making Abstract Concepts Tangible
<b>Storytelling</b>	Knowledge Integration and Transmission
<b>Gaming</b>	Feedback Loops and Formative Assessment

## Surveying Seymour Papert's Four Expectations

---

- **Expectation 1:** suitably designed formative/summative assessment rubrics will show improvement when compared to traditional instruction.
- **Expectation 2:** students will show more instances of work at progressively higher levels of Bloom's Taxonomy.
- **Expectation 3:** student work will demonstrate more – and more varied – critical thinking cognitive skills, particularly in areas related to the examination of their own thinking processes.
- **Expectation 4:** student daily life will reflect the introduction of the technology. This includes (but is not limited to) directly observable aspects such as reduction in student attrition, increase in engagement with civic processes in their community, and engagement with communities beyond their own.

## Bloom's Taxonomy: Cognitive Processes

Anderson & Krathwohl (2001)	Characteristic Processes	
<b>Remember</b>	<ul style="list-style-type: none"> <li>• Recalling memorized knowledge</li> <li>• Recognizing correspondences between memorized knowledge and new material</li> </ul>	
<b>Understand</b>	<ul style="list-style-type: none"> <li>• Paraphrasing materials</li> <li>• Exemplifying concepts, principles</li> <li>• Classifying items</li> <li>• Summarizing materials</li> </ul>	<ul style="list-style-type: none"> <li>• Extrapolating principles</li> <li>• Comparing items</li> </ul>
<b>Apply</b>	<ul style="list-style-type: none"> <li>• Applying a procedure to a familiar task</li> <li>• Using a procedure to solve an unfamiliar, but typed task</li> </ul>	
<b>Analyze</b>	<ul style="list-style-type: none"> <li>• Distinguishing relevant/irrelevant or important/unimportant portions of material</li> <li>• Integrating heterogeneous elements into a structure</li> <li>• Attributing intent in materials</li> </ul>	
<b>Evaluate</b>	<ul style="list-style-type: none"> <li>• Testing for consistency, appropriateness, and effectiveness in principles and procedures</li> <li>• Critiquing the consistency, appropriateness, and effectiveness of principles and procedures, basing the critique upon appropriate tests</li> </ul>	
<b>Create</b>	<ul style="list-style-type: none"> <li>• Generating multiple hypotheses based on given criteria</li> <li>• Designing a procedure to accomplish an untyped task</li> <li>• Inventing a product to accomplish an untyped task</li> </ul>	

### **Redefinition**

*Tech allows for the creation of new tasks,  
previously inconceivable*

### **Modification**

*Tech allows for significant task redesign*

### **Augmentation**

*Tech acts as a direct tool substitute,  
with functional improvement*

### **Substitution**

*Tech acts as a direct tool substitute,  
with no functional change*

**Create**

**Evaluate**

**Analyze**

**Apply**

**Understand**

**Remember**
