CALL TO K-12 TEACHERS:
Experience BRING's Education Program
in your Classroom Today!
Now Scheduling School Visits

BRING Recycling works under contract with Lane County to provide educational outreach to all Lane County schools. This service is provided free of charge.

BRING's Educator will come to your school and show your students how the stuff we use shapes the planet we share. We do this through assemblies, classroom presentations, and unit specific lessons tailored to the individual teacher's needs. All lessons leave the kids with concrete actions they can take today to begin making a positive change.

Our lessons are tied to the State Standards in social studies[1] and science [2] and to the Common Core Standards[3]. Applicable standards ([1, 2, 3]) are printed on the back of this flyer.

The Three Rs:
- Students learn the importance of waste reduction and reuse and, that recycling isn't what we think it is.

Trash Audit:
- Students identify and record the components of their waste stream and organize the data collected.

Where Stuff Comes From:
- Students learn what natural resources are used to make the stuff of their everyday lives.

Vermicomposting:
- Students learn how vermicomposting can help with waste reduction goals while learning about red wiggler worms and worm bin ecosystems.

Paper Making:
- Students learn about paper recycling and its importance in waste reduction while making paper they can take home.

Global Climate Change:
- Students learn the current state of the science of global climate change as well as the political controversy.

Food Waste:
- Students learn about the costs associated with food waste.
