To : Howard Staff <howard_staf@4j.lane.edu>

Hi Everyone,

Attached are electronic versions of the documents shared at today's ALICE training on how classroom teachers will teach students these new safety drills. For staff who did not attend the training, feel free to review this material and let me know if you have any questions. Linked here is a copy of my presentation: <https://prezi.com/view/JOfSgBFAVnaMqiJIAuBF/>

Also attached is the PowerPoint presentation (and a PDF version with notes) that classroom teachers will use to teach the safety drills to students on Wednesday, May 10th. After going through the PowerPoint, teacher will read the book [I'm Not Scared, I'm Prepared](#) with the attached guiding questions. **The following day on Thursday, May 11th at 9:00, we'll practice the Lockdown: Evacuation Drill.** For that drill I will press the office lockdown button (dropping curtains, locking exterior doors, and closing [not locking] doors to each wing) and will announce the following:

*Attention students, staff and visitors: This is a LOCKDOWN: EVACUATE **DRILL**, this is a LOCKDOWN: EVACUATE **DRILL**. Repeat, this is a NOT A REAL EMERGENCY. THIS IS A **DRILL**. We are pretending there is a dangerous person (or intruder) in the building on the other side of the building from your classroom. We are pretending there is a dangerous person (or intruder) in the building on the other side of the building from your classroom. WE ARE IN A LOCKDOWN: EVACUATE **DRILL**.*

Teachers will then direct students to evacuate the building to the nearest location on the perimeter of the school grounds. Classes will stop at the edge of the property and wait for my all-clear announcement. In a real emergency, students and staff would evacuate well past the school the edge of the property, getting much further away.

Those are the basics. Please let me know if you have any questions.

Allan
