

Foundations in Mathematics Grades K-5

Who?

This course is available to current 4J elementary classroom and special education teachers (*priority for first-time participants*)

When?

June 26 - 28

8:00 AM - 4:00 PM (hour lunch on your own)

Where?

4J District Office Auditorium

Credit?

Participants have the opportunity to earn 1 University of Oregon Credit at a reduced rate

Compensation?

Yes! For this voluntary opportunity you will be paid extended contract for 2 of the 3 days.

Participants Will:

-Increase their **mathematics content knowledge**, emphasizing the progression of student understanding within & between the domains of:

- Operations & Algebraic Thinking
- Numbers in Base Ten
- Fractions

-Recognize common **student misconceptions** on important mathematical topics and learn to identify root causes and potential responses

-**Plan** relevant instruction to support students' conceptual understanding to develop procedural fluency.

How do I sign up?

Please register at: <https://bit.ly/2JFIVbH>

Past Participants Say...

Melissa from Buena Vista...Today was awesome! Thank you for helping me grow my own math brain around fractions. I really appreciate that the environment felt collaborative and not competitive”

Robin from Howard said: “This workshop has been invaluable for me in preparing to teach third grade math. I feel like I have a much deeper understanding of the third grade standards...”

Lily from Chavez said: “I really enjoy how the class is structured. So often PD sessions are more easily run as lectures. I enjoyed being able to collaborate with multiple grade levels, multiple teachers, and multiple schools. It was helpful as a specialist to see what happens and how they progress across grade levels.”
