

video.link/Safari/Mac OS Work Around

When you have this issue with Safari and when you try to open any Video.Link Video. The page does this below.

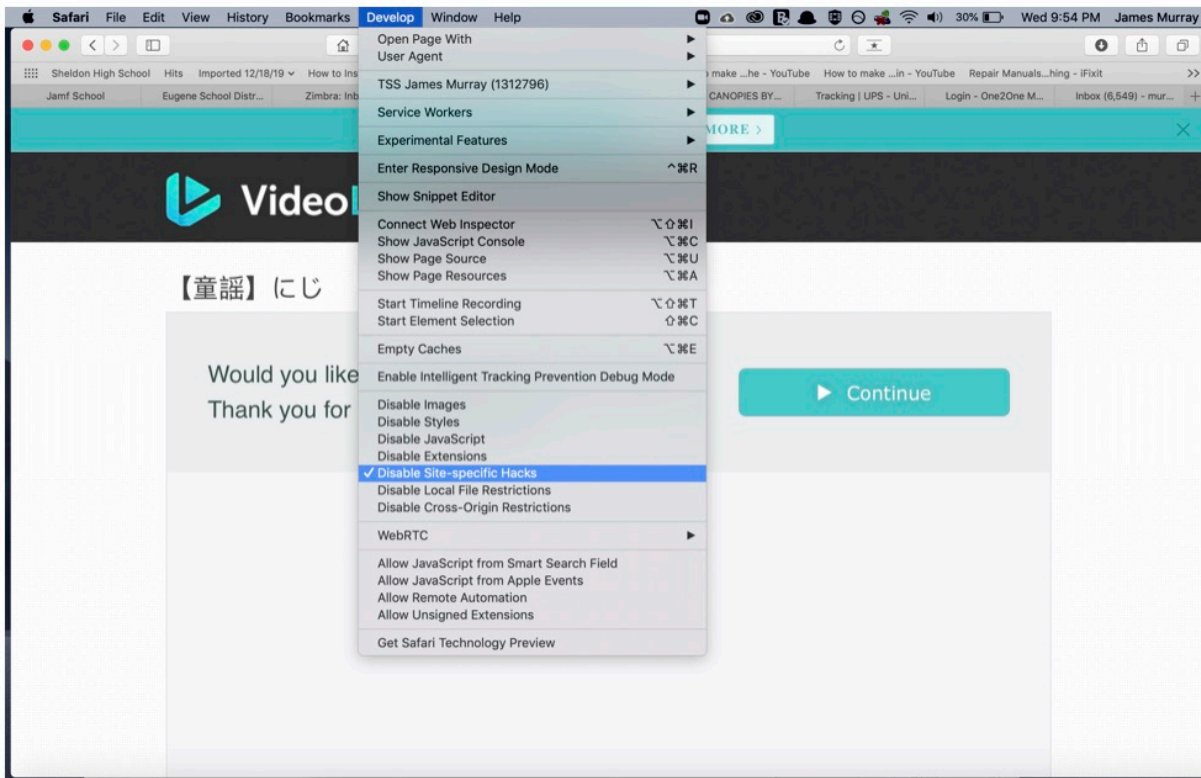

This is how you get around this:

While the Safari Page is open on the Toolbar click Develop, then scroll down and Click on Disable Site-specific Hacks.

video.link/Safari/Mac OS Work Around

Once you see a checkmark next to the Disable Site-specific Hacks you need to go back to the website and click the refresh button or continue button and it will play the video for you. That is the work around for Mac OS laptops.
