Allan,

To clarify, our COVID prevention protocols will be put into place daily (frequent touch-point disinfecting throughout the daytime, including restroom touch-point disinfecting). Each night, our Custodians will have an enhanced focus on spot cleaning for visible soil on the common touch-points, in preparation for the electrostatic disinfection that will occur afterwards. We are currently looking at having a couple of Custodians per HS region perform the electrostatic disinfecting, to increase efficiency and proficiency, however, each Custodian will be trained, and each school will have their own hand-held electrostatic sprayer (for daytime Custodian use) and a backpack electrostatic sprayer for evening Custodian use. The regional model likely won't go into effect until all grade levels are returned to hybrid. We currently have a posting out for a number of Limited Duration Custodial positions to support this regional model (using these limited duration folks to back-fill 2 positions at the HS's, and assigning 2 from the HS's to comprise these regional teams. (That part has not yet been shared with the HS Principals or Custodians, as Kyle and I met on that plan just last week).

Wednesdays will be spent performing aesthetic cleaning catch-up - non-COVID tasks. Things such as cleaning disinfectant residue off of surfaces, running the spot extractors on the milk spills on carpeting, catching up on mopping hard floors, etc.

We have COVID response protocols for when we have a known or suspected case of COVID-19, and those are essentially an enhancement of the prevention protocols, however, instead of just hitting the high-frequency touch point, specify electrostatically spraying all surfaces in an impacted space from 8' and down, not just the desks, light switches, sink faucets, etc. It also calls for a "rest period" (2hrs up to 24hrs, if possible) of the impacted spaces before sending a Custodian in to disinfect, which eliminates the need for additional PPE, per OR-OSHA.

We should be shipping out a FAQ (not a Fah-Q) to all Building Admins within the next day or two - I think it is just being cleaned up now. This won't have all these details, but will touch on some of them.

I've also just sent out a Google doc invite to all Custodians so they can pin their current questions up there, and I will ensure I get those answered to the best of our abilities before we connect with our Elementary Custodians, by Region next week (we're still waiting on a couple of our accessories to the new procedures to arrive and will disseminate at this training).

-Trevor

Subject: Electrostatic Spray Schedule

Hi Trevor,

Do you know how often classrooms will be cleaned with the electrostatic spray?

Daily? On Wednesdays? Only when a kid is sick?

I wasn't sure and thought you might be the man who would know.

Thanks,

Allan
