

Architects in Schools

Bringing design to students across Oregon

Introduce elementary school students to the power and possibilities of design through the Architecture Foundation of Oregon Architects in Schools program. This program creates lifelong learners and critical thinkers who have a greater understanding of their environment and its impact on people's lives.

Gain access to design based lessons and videos or partner directly with a design & building professional to implement customized, creative, hands-on lessons for your class. However it works best for your class, this program can serve you! **Architects in Schools is offered free-of-cost to Oregon schools.**

Learn more and apply to participate today: bit.ly/ais21-22_info

Adaptable for distance, hybrid and in-classroom learning

Increases engagement from low-income students and non-traditional learners

Connects classroom curriculum to real life experiences

Inspires the next generation of creators
