

# AMSR

## ASSESSING AND MANAGING SUICIDE RISK

In recent months, we've learned that there is an increased regional need to empower the behavioral health workforce to manage suicide risk in outpatient settings. AMSR provides participants with the core competencies to screen, assess, safety plan and manage the care of people at risk of suicide. No previous training is required, however AMSR provides advanced skills for professionals who have already taken QPR or ASIST. Click [here](#) to learn more about AMSR content and objectives.
