Hello,

I just wanted to give you a heads up and let you know that I will be sending some door magnets with Marcus. Not sure if you have heard Kari talk about the Lockdown Magnetic Strips for classroom doors. The way they are supposed to work is cover the latch plate with the magnet strip and lock the door, the doors are supposed to be kept locked but be able to open and close the door with the magnetic strip in place. These magnets are to help secure classrooms during a lock-down or emergency. These are only for interior door classrooms, please provide me with any feedback once you receive them and begin using them. Let me know if you have any questions.

I appreciate your help in rolling the magnets out and am thankful for all that you do.

Thank you,

Eugenia Gonzalez
