

This form <u>must</u> be used to document <u>on-the-job-injuries requiring treatment beyond first aid.</u> The information provided below will enable both the school and district to learn about what contributed to the incident and discover potential system failures so they can be corrected. If possible, this form should be completed and submitted to your supervisor within 24 hours of injury. Complete an 801 form (saif.com/801form) if the event was an injury that required medical treatment beyond first aid. All work-related fatalities and events that result in the hospitalization of three or more workers must be reported to Oregon OSHA (bit.ly/3eA8LOJ) within eight hours. Report inpatient hospitalization, loss of an eye, or an amputation/avulsion to Oregon OSHA within 24 hours by phone, 800.922.2689. When sharing this form with others, please remove all employee names to protect confidentiality.

First page to be completed by injured staff member. Second page to be completed by the supervisor.

The "Why" Root Cause Analysis

Repeatedly asking the question "why" can help you drill down to the root cause of an incident. For instance, if an employee slipped and fell, the line of questioning could go as follows:

- Why did they slip? Answer: The floor was wet.
- Why was the floor wet? Answer: It was raining and water pooled in the front of the building.

| The scenario: Why 1: Why 2: Why 3: Root Cause Narrative Based on your analysis, describe what caused the incident: Possible Corrective Action Isolate and guard the hazard Automate a manual process Remove the hazard (redesign) Add signage and warnings Add signage and warnings Use safety glasses Use cut resistant clothes | | |
