Hello all,

I am reaching out to inform everyone that our environmental consultant, PBS, will be onsite next week to conduct ODE required lead in drinking water testing throughout your school. PBS will arrive the evening prior to testing to place "Do Not Use" tags on fixtures to ensure water stays stagnant for the required 8-12 hours prior to sample collection. They will then return the next morning to conduct testing on required fixtures. All tag placement and sample collection will be completed during off hours, so it should have no impact on fixture use throughout the school day. Please see below for the proposed schedule, and let me know if you have any questions.

Holt and Adams - Tag out fixtures evening of 11/13/23, Conduct testing morning of 11/14/23

Howard - Tag out fixtures evening of 11/14/23, conduct testing morning of 11/15/23

River Road - Tag out fixtures evening of 11/15/23, conduct testing morning of 11/16/23

Kelly - Tag out fixtures evening of 11/16/23, conduct testing morning of 11/17/23

Thanks,

Daniel Lyons
