Science-Hohenemser

Read a scientific article about a rat experiment where scientists in the 1930s tried to find out what happens to the proteins we eat. Are they excreted or used for building and repair? pages 71-74 in the SN.

Students need to mark the text (circle and underline) and then after each section make sense of the information with the questions on pages 69-70.

Within each section, students should draw a diagram of their understanding of the information in addition to writing an answer in words. diagrams go on the right.

HW: pages 75- the top third of p 78. Mark text three margin notes.
