Elevator Speech

My PSA is going to be on the topic of teen depression. The information that I am putting on my PSA includes facts about the number of teens that go through depression, and then commit suicide. Also i'm putting in what can cause depression and how you can help someone going through depression, and where you can call or get help. I will include photos, facts and what people do to try and make themselves feel better.

The targeted audience for my PSA is around the ages of 13 and 21. I hope that after someone watches my PSA it inspires them to help and realize that more teens go through depression than they think, If they see anyone talk about or see anything about depression or suicide then they should contact a therapist or someone to be around. This topic is very important to me because when there is depression then that can result to suicide, and that is a loss of a loved one for a family or friend.
