

Uses for drones

1. Small, light and quick
2. Aerial photography
3. Film and tv footage
4. Aerial mapping
5. Archaeological research and scanning
6. Filming marine wildlife
7. Filming land wildlife
8. Anti poaching
9. Environmental and meteorological monitoring.
10. Police work
11. Search and rescue
12. Property photography
13. Domestic roof inspections
14. Industrial roofing inspections
15. Planning inspections
16. Solar park inspections
17. Environmental compliance inspections
18. Drone deliveries
19. Disaster relief
20. Emergency medical supplies
21. News filming
22. Sports filming
23. Pipeline and powerline inspections
24. Tunnel inspection
25. Precision and agriculture with fixed wing UAV
26. Advertising and promotional videos.
27. Weddings parties and special events
28. Drone racing and vr
29. Making a art with a drone
30. Aircraft inspection
31. Internet access

Summary: This video talked about certain things that drones are used for. I think that drones are very important to our modern society because they help us in ways that is either too risky for humans to do, also that may be harmful to us. We can also have a lot of fun with drones. They mentioned that drones do a lot of inspections, so that shows that they can get places where people cannot if that means that it is a tight space, or it is too dangerous.
