Elevator Speech for Discrimination PSA

We are making a PSA about being discrimination at our school. We would like to include things that actually happens at our school and some other things that may be offensive to people. I would like to include solutions to the problems that we will talk about plus more solutions and signs of people being discriminated against. We want to make this PSA able to show people the signs of being discriminated, and that discriminating is not good and you could get in serious trouble for doing it. If more people realize to not do it, then they will stop or tell someone that they know to stop. We hope to get this PSA done soon
