

Earthquakes in the last 100 years with magnitude > 7.0

This chart shows earthquakes in last 100 years with a magnitude > 7.0. This chart only has states from the west. I used a chart to layout out my data.

There is an outlier here in this chart. The outlier is Alaska with 69 earthquakes. Oregon and Washington have had no earthquakes. Hawaii and Idaho have had one earthquake. Nevada has had three earthquakes. California has had 11 earthquakes.
