Eugene's Normal Daily Temperature 1961-1990

This graph shows Eugene's normal daily temperature from 1961-1990. I used a line chart for the data.

The maximum temperature is 81.8 and the minimum temperature is 46.2. The temperatures get higher in the summer (July-September), and gets colder in the spring, winter, and fall (winter- January- March, spring- April-June, fall- October-December).
