H₂O

habitat - address
Niche - occupation

↳ Competition EXCLUSION
principle - no 2
SPECIES can occupy
SAME niche @
SAME time

$$D = \frac{N(N-1)}{\sum n(n-1)}$$

N = total #
 of indivs
 in pop
 n = # of eq.
 species

$N = 200$ indivs.

$\sum n(n-1) = 850$

$$D = \frac{200(199)}{850} = 46.8$$

Factors Affect B. DIV — ↓

- DEFORESTATION
- INTRO. OF EXOTIC SPECIES
- DEVELOPMENT / FRAGMENTATION
- OVER-HARVESTING

Ecol. succession - AFTER DISTURANCE

PRIMARY - ON NEWLY EXPOSED SURFACES

SECONDARY - ON SOIL

Community interactions - ENERGY

- Predator/prey
- symbiosis
 - mutualism - both benefit
 - commensalism - 1 benefits
other not help / not harmed
 - parasitism - 1 benefits, other
harmed
