

1. A string vibrates at a frequency of 20 Hz. What is its period?  $\frac{1}{20} \text{ sec.}$

2. A speaker vibrates at a frequency of 200 Hz. What is its period?  $\frac{1}{200} \text{ Sec.}$

3. A swing has a period of 10 seconds. What is its frequency?  $\frac{1}{10} \text{ Hz}$

4. A pendulum has a period of 0.3 second. What is its frequency?  $3.3 \text{ Hz}$

5. You want to describe the harmonic motion of a swing. You find out that it take 2 seconds for the swing to complete one cycle. What is the swing's period and frequency?

$$\text{period} = 2 \text{ sec} \quad \text{FREQ} = \frac{1}{2} \text{ Hz} \quad (0.5 \text{ Hz})$$

6. An oscillator makes four vibrations in one second. What is its period and frequency?

$$\text{PERIOD} = \frac{1}{4} \text{ sec} \quad (0.25 \text{ sec}) \quad \text{FREQ} = 4 \text{ Hz}$$

7. A pendulum takes 0.5 second to complete one cycle. What is the pendulum's period and frequency?

$$\text{PER} = 0.5 \text{ sec} \quad / \quad \text{FREQ} = \frac{1}{0.5} = 2 \text{ Hz}$$

8. A pendulum takes 10 seconds to swing through 2 complete cycles.

a. How long does it take to complete one cycle?  $5 \text{ sec.}$

b. What is its period?  $5 \text{ sec}$

c. What is its frequency?  $\frac{1}{5} \text{ Hz}$

9. An oscillator makes 360 vibrations in 3 minutes.

a. How many vibrations does it make in one minute?  $120$

b. How many vibrations does it make in one second?  $2$

c. What is its period in seconds?  $0.5 \text{ sec}$

d. What is its frequency in hertz?  $2 \text{ Hz}$
