

Animal Kingdom Short Test – What to Know

Biology I – Landis

- Have your chart on which you took notes during student presentations for the test. Ideally you have taken careful notes on it
- Hope that your fellow classmates have written questions that you can reasonably answer based upon the notes from their presentations
- Be able to compare and contrast vertebrate and invertebrate animals
- Be able to compare advantages of asexual and sexual reproduction
- Be able to discuss types of animal body symmetry
- Be able to identify the terms for the front, back, top and bottom of animal bodies
- Be able to discuss 4 different feeding types
