

Biology Laboratory Safety Agreement

The Biology Laboratory is a safe place to experiment if you're careful. You must assume responsibility for the safety of yourself, your classmates, and for the equipment entrusted to your care. You must be mindful of the following safety rules at all times while in the laboratory.

1. While you may bring bottled drinks into the room, do not consume any food while in class.
2. Don't perform unauthorized experiments. Always obtain the instructor's permission.
3. Always read through the lab activity instructions before beginning an experiment.
4. Know the location of the fire extinguisher, safety shower, eye wash station and first aid kit.
5. Always aim a fire extinguisher at the base of the flames of a fire
6. Report any accident or injury to the instructor immediately, even if it seems minor.
7. If you spill acid on skin, immediately place it under a running sink faucet and notify the instructor.
8. Never taste any chemical substance.
9. Place broken glass in designated containers, never in the regular trash can.
10. When using razor blades, always cut away from you and your lab partner.
11. Wear safety goggles when working with hazardous substances.
12. Know how to use and care for microscopes. Care for all other lab equipment responsibly.
13. When your lab is complete, put away all materials to their proper places and clean up your lab area.
14. Use common sense. Think before you act.

I have read and understand the safety rules. I will abide by these rules when in the Biology lab.
