

# Getting Photos!

1. Open up Wonderpage.
2. Click on Photography in the left column.
3. Choose Google Images -- it's the first square.
4. Type in the name of what you're searching for and hit the "RETURN" key.

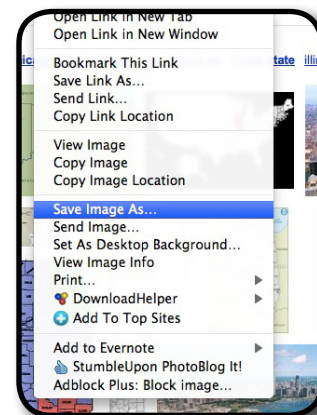

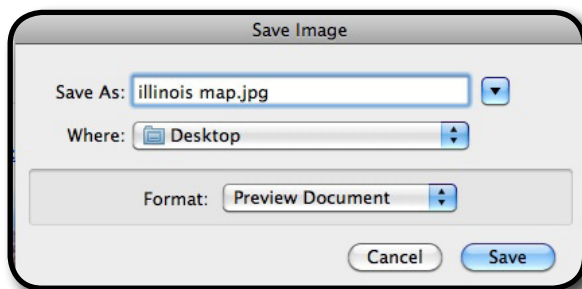

5. You want a high quality photo for your project so choose "Large" under "Any Size."

6. Look through the photos and find the one you want.

7. When you find one you want, hold down the "CONTROL" key on the keyboard and click the picture you want. A menu appears. Choose "SAVE IMAGE AS" and type in what it is (for example, Illinois map). Make sure you save it to the Desktop so you can find it easily.
