

# Moon Notes

Name \_\_\_\_\_  
Period 2   3   5   6

1. How long does each moon phase last?
2. Does everyone on Earth see the same phase during the same 24-hour period?
3. What causes the shadow that covers the moon during phases?
4. Is the side of the moon we can't see always dark?
5. Why do we always see the same side of the moon from Earth?
6. Can we see the moon during the daytime?
