

FIELD STUDY #1

Name _____

Date: _____

Period _____

Overview:

1. Describe the weather.
2. Close your eyes. What are the sounds and smells in your spot?
3. What evidence do you see that tells you what the weather was in the past week?
4. Besides your focus plant, what other plants are in your area? What changes do you see?
5. Besides grass, what is the most common plant you see? How many are there?

Animals

6. Did you see or hear any animals today? (look carefully!) If so, list them.

7. What are the animals doing?

8. Describe any evidence of animals do you see. (things like tracks, feathers, etc.)

Your Focus Plant:

9. What does your plant look like today? (At least three observations)

10. How many colors can you find on your plant? What are they?

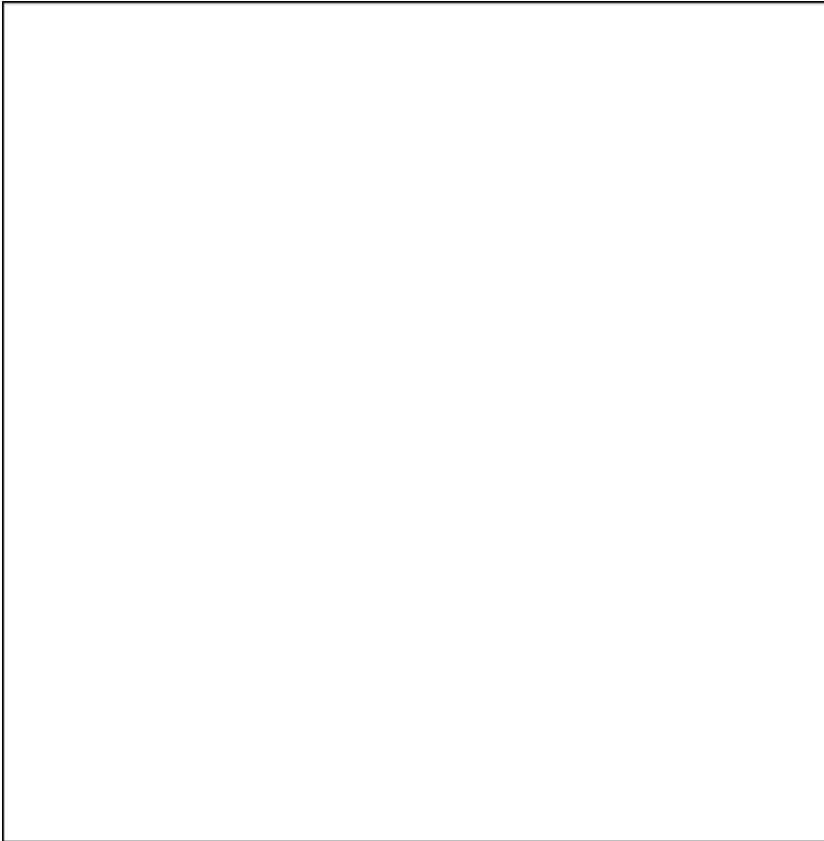

FIELD STUDY #1

Name _____

Date: _____

Period _____

11. Labeled drawing or picture of the same Focus Plant: *(if you want, you can draw or take a pic of just a small part of the plant, like the flower or a few leaves)*

12. What interactions were observed today? Why do you think those interactions were happening? *(interactions are things that happen between organisms or organisms and their environment. Example: a bird interacting with a tree to build a nest)*

13. I wonder ... (what is something you would like to know about related to the area you are observing?)
