

FortiClient VPN for iPhone & iPad

1. Download the **FortiClient** app on your mobile device. You can find it by searching the **App Store** for **FortiClient**, or by visiting this address in Safari: <http://apple.co/2gZSiYF>
2. Open the **FortiClient** app. If you are asked to allow FortiClient to add VPN configurations, tap **Allow**.

3. Tap on **Connections**.

4. Tap on **Add Configuration....**

5. Add the settings as shown (top right of this page), filling in the **User** and **Password** fields with your own 4J username and password.

6. Tap the **Save** button at the top right of the screen.
7. Tap the **Done** button at the top right of the screen.
8. Tap on **< VPN** at the top left of the screen.

9. Tap the switch next to **VPN**. Once it connects you may leave the app and access the desired 4J resources (email, etc.)

10. When you are finished, return to the FortiClient app and tap the same switch to turn VPN back off.
