I wanted to share a new resource that is available for free until November 30th. You might want to share with your teachers. The company that produces TumbleBooks now has TumbleMath. It includes lesson plans and quizzes that are aligned to common core standards. The email below provides details for accessing the free trial.

Enjoy -

Untitled Document

**Dear Teacher:**

Educators and librarians have long recognized the value of math-themed story books in order to teach math concepts - especially for reluctant learners.

TumbleBooks is pleased to announce the launch of **TumbleMath** - the most comprehensive collection of math story and picture books available online - in the TumbleBook format you and your students have already long loved!

Animated, talking picture books are perfect for elementary students and now math storybook favorites such as *One Odd Day*, *Equal Shmequal*, and *A Very Improbable Story*, as well as books from series like **Math Starts** by Stuart J. Murphy, **Sir Cumference**, **Mouse Math**, **Math Matters**, and **Math is Categorical** come to life in an engaging and entertaining way.

We also have a large selection of titles from teacher-favorites David Adler and Loreen Leedy!

Pick a category, whether it is Addition, Multiplication, Fractions, Geometry, Word Problems, or Money, to name just a few, and you will find books to help you to introduce and teach that math concept.

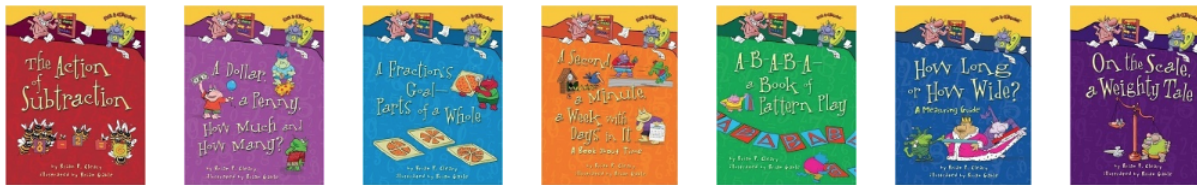

In addition to the story books, we also feature a large selection of non fiction math books from Encyclopaedia Britannica and Rosen!

But that's not all! The collection includes **lesson plans** and **quizzes** aligned to Common Core and State/Provincial standards, to accompany every title making it an indispensable tool for math teachers everywhere.

Our Math Tracker program allows you to follow the progress of each student as they learn and master new math concepts.

And now TumbleMath is absolutely free, with no commitment or obligation, until the end of November!

Simply reply to this email, and we will set you up with your own trial account so you can start taking advantage of this amazing resource!

TumbleMath- a database which all adds up!!!

From, your friends at
